

Video Editing Instructions File

This document provides a template and guidelines for video editors working on a project. Please adhere to these instructions and best practices to ensure a consistent and high-quality final product.

Project Overview

Project Name	Client/Target Audience	Estimated Duration	Deadline
[Project Name Placeholder]	[Client/Target Audience Placeholder]	[Estimated Duration Placeholder]	Date

The primary goal of this video is to [briefly state the main objective, e.g., introduce a new product, provide a tutorial, recap an event]. The overall tone should be [e.g., informative, energetic, corporate, friendly].

Raw Footage and Assets

All raw footage and necessary assets are organized in the following locations. Please ensure you have access to these files before starting.

- Raw Footage Link: File
- Music/Sound Effects Library: File
- Graphics/Branding Package: File
- Script/Storyboard: File

Editing Guidelines

1. Technical Specifications

Please use the following settings for the project and final export:

Specification	Value
Resolution	[e.g., 1920×1080 (HD), 3840×2160 (4K)]
Frame Rate	[e.g., 24fps, 30fps, 60fps]
Aspect Ratio	[e.g., 16:9, 4:3, 1:1]
Deliverable File Type	[e.g., .mp4, .mov (H.264)]
Target Bitrate	[e.g., 10-20 Mbps]

2. Branding and Graphics

- **Logo Placement:** The company logo should appear in the [e.g., top-right corner] throughout the video, except during the opening title and end screen.
- **Color Palette:** Use the colors specified in the branding package for all on-screen text and graphics.
- **Lower Thirds:** Use the standard lower-third template when introducing speakers. Lower thirds should display: [Name] and [Title/Role].

3. Audio and Music

- **Dialogue/Voiceover:** Audio should be clear, normalized to -6 dB to -12 dB. Remove all background noise and excessive 'ums' or pauses.
- **Music:** Use background music provided in the music library. Music should be mixed so that it does not overpower the dialogue. Fade music out at the end of sections or during key transitions.
- **Sound Effects (SFX):** Only use SFX where explicitly requested in the script/storyboard or to enhance the viewing experience without distraction (e.g., subtle transition sounds).

4. Style and Pacing

- **Pacing:** The video should be edited with a [e.g., fast, moderate, slow] pace. Avoid cuts that linger too long or feel too abrupt.

- **Transitions:** Prefer [e.g., clean cuts, subtle cross-dissolves]. Avoid overly stylized transitions unless specifically instructed.
- **B-Roll:** Use B-roll footage to visually support the narration/dialogue. Match the B-roll to the content being discussed.

Review and Feedback Process

The initial draft of the video must be submitted to Person by Date.

1. **First Draft:** Submit a low-resolution proxy for review.
2. **Revision 1:** Incorporate feedback received from Person.
3. **Final Cut:** Deliver the final, full-resolution file to the designated shared folder.

Please direct any questions regarding the instructions or assets to Person. You can also schedule a brief check-in meeting for clarification here: Calendar event.
